

Requirement Analysis

1. Project Title

Student Hub Portal

2. Problem Definition

Students often need to visit different platforms to access course materials, assignments, attendance records, and results. This makes academic information difficult to manage and track.

The Student Hub Portal provides a centralized platform where students can access all academic information from a single website.

3. Project Objective

The objective of the Student Hub Portal is to:

- Provide easy access to course information.
- Allow students to view assignments and deadlines.
- Display attendance records.
- Show examination results.
- Manage student account settings.
- Improve organization of academic information.

4. Scope of the System

The system is designed for students and provides:

- User Registration
- User Login

- Course Information
- Assignment Tracking
- Attendance Monitoring
- Result Viewing
- Profile Management

5. User Roles

Student

- Register an account
- Login to the portal
- View courses
- Check assignments
- Monitor attendance
- View results
- Update profile settings

6. Functional Requirements

Authentication Module

- Student can sign up.
- Student can log in.
- Student can log out.

Course Module

- Display available courses.
- Show course details.
- Display faculty information.

- Display study materials.

Assignment Module

- View assignment details.
- View due dates.
- Check submission status.

Attendance Module

- View subject-wise attendance.
- View attendance percentage.

Result Module

- View examination results.
- View subject-wise performance.

About Module

- Display portal information.
- Show services offered.
- Provide contact information.

Settings Module

- View profile.
- Change password.
- Edit personal information.
- Logout
